

BAILEY MEZZA

MSc Software Development Graduate at QUB

PROFILE

I am a determined, honest, and adaptable Masters graduate seeking a suitable graduate job based in Northern Ireland. I consider myself a very co-operative individual with a strong drive to see things through to completion and would love the chance to work alongside a creative team that I could grow my career with.

PROGRAMMING PROJECTS

GRAVITATION.JS

JavaScript

Feb 2025 – August 2025

- Through my dissertation, I built a planetary gravity simulator with a custom JavaScript engine and renderer. It has the capabilities of calculating orbital mechanics and rendering them on HTML canvas.
- The project is modularised, to allow others to take the engine or renderer and add their own code to it.
- A list of demos showing users how to make projects themselves is also included as well as examples that aim to showing off the capabilities outside of a simulation.
- Live version can be accessed at from my website.

KAINOS CODE CONNECT CHALLENGE

JavaScript

Jan 2025

- Across a 2-day event, worked alongside peers to develop efficient algorithms under time constraints, enhancing problem-solving and logical thinking skills.
- Created a CRUD employee system through JavaScript and approached the problem using AGILE development methodologies.

BREEDING BIRD DEMOGRAPHY STATISTICS

R & R Studio

Feb 2023

- Analysed population and behavioural trends across the UK using statistical methods and R for data visualization. Processed large datasets to identify patterns in bird breeding distributions working in conjunction with RSPB, WWT and the Cornell Lab of Ornithology.

EDUCATION

MSc SOFTWARE DEVELOPMENT

Distinction

Queens University Belfast

Sep 2024 – Nov 2025

On track to achieve a Distinction level grade overall. Obtained distinction level marks in java programming, database design and Software Fundamentals. Further completed modules on web design, and software engineering. Completed my dissertation based in JavaScript, creating a physics engine for celestial mechanics. Completed projects such as constructing a database that could function as the backend for a ticket purchase system or a monopoly style quiz game using pure Java. Effectively collaborated in a team environment using Agile methodologies. Successfully used Jira to design and implement a fully functional java application. Furthermore, the application was then tested using j-unit methodologies. Delivered clear and concise documentation for software projects, ensuring maintainability and knowledge transfer through the use of Javadoc and GitHub.

EXTRACURRICULAR

DUKE OF EDINBURGH AWARD

I completed my Silver DoE Award in 2018, demonstrating commitment, teamwork, and resilience. Developed skills through outdoor expeditions, volunteering, and physical challenges.

VOLUNTEER WORK

I volunteered at Cancer Focus NI on the Ormeau Road from 2017 to 2019, assisting with fundraising events, community outreach, and administrative tasks.

UoG EMPLOYABILITY AWARD

I completed the University of Gloucestershire Employability Award, enhancing my skills in professional communication, teamwork, leadership, and problem solving through workshops, networking events, and reflective assignments.

ACHIEVEMENTS

WORCESTERSHIRE AWARD IN ANIMAL CONSERVATION RESEARCH

Won the award for my dissertation, on Curlew Breeding Environments. Recognized for excellence in ecological fieldwork, data analysis, and species monitoring. Demonstrated strong research, critical thinking, and scientific communication skills, contributing valuable insights to biodiversity conservation and management.

BROWN BELT IN JIU JITSU

Achieved my brown belt after 7 years of consistent training at the same gym. Rewarded for discipline, perseverance, and advanced martial arts skills.

EDUCATION CONT.

BSc HON ANIMAL BIOLOGY

2:1

University of Gloucestershire

Sep 2020 - Jun 2023

Received distinction level grades in multiple modules, including biostatistics and bioinformatics.

Collaborated on research with industry professionals from WWT and RSPB for my dissertation project on the endangered Eurasian Curlew population and their breeding behaviour.

Assisted in team-based research on Skomer Island for a month on Pu fin and Manx Shearwaters breeding anatomy.

Co-authored a scientific report during my internship with Ocean Ecology on water toxicity levels in salmon fisheries.

A LEVEL

Methodist College Belfast

Sep 2018 - Mar 2020

A - B grades in Maths, Biology, Economics, and Psychology.

GCSE

Methodist College Belfast

Sep 2016 - Aug 2018

A* - B grades in all my subjects. Maths, Computing, Biology Chemistry, Physics, English, and more.

EXPERIENCE & EMPLOYMENT

SOFTWARE ENGINEERING INTERN AT CUMULUS NEUROSCIENCE

Titanic Quarter, Belfast

Oct 2025 - Ongoing

Responsibilities included writing, testing, and debugging code. Collaborating with development teams, participating in code reviews, and contributing to project documentation. Also to assist with troubleshooting issues, helping to optimize software, and staying updated on the current best practices, trends and technologies of the industry.

RETAIL ASSISTANT AT RETAIL ZOO LIMITED

Ormeau Road, Belfast

Jan 2025 - Ongoing

Responsibilities included assisting customers with inquiries and purchases, maintaining stock levels and store cleanliness, processing transactions accurately, and ensuring compliance with company policies and health and safety standards.

BARISTA AT STARBUCKS

Connswater, Belfast

Jun 2024 - Jan 2025

Responsibilities included preparing and serving high-quality beverages, maintaining cleanliness and organization in the café, assisting customers with personalized recommendations, processing transactions accurately, and upholding brand standards for service and presentation.

ASSISTANT SCIENTIFIC OFFICER AT AFBI

Stormont, Belfast

Jul 2023 - Jun 2024

Developed advanced technical and analytical skills while contributing to scientific research and laboratory operations in a professional setting.

Responsibilities included performing precise laboratory testing and analysis on agricultural and environmental samples, adhering to strict quality control and assurance standards.

Collaborated with multidisciplinary teams to design and implement experiments, ensuring accurate data collection, validation, and reporting for research and regulatory purposes.

Gained expertise in biostatistical programming and database management, contributing to the analysis and interpretation of complex datasets.
